| | • National Competition Winner |

WORK EXPERIENCE

Michelin India Pvt Limited: *Senior Salesforce Developer*

December 24– Present

- Designed IAM-based onboarding platform for **50K+ external users**, enabling secure self-registration, passwordless authentication, and consent management using **LWC, Apex, Login Flows, and SSO (SAML/OAuth)**.
- Designed scalable external user approval system with LWC admin dashboards and asynchronous processing (Batch/Scheduled Apex), supporting **10+ applications** and preventing **10K+ unnecessary license consumption**.
- Led AI-driven integration of Agentic AI, Google Gemini OpenAI (LLM) with Salesforce to automate case and email summarization/classification, improving operational efficiency; deployed across Europe & Asia regions, used by **8K+ active users**.
- Built high-throughput S2S integrations and improved platform reliability, increasing **10K+ customers** (30% adoption) and **multi-million revenue** workflows, while reducing production defects by **20%** through code quality initiatives.

Salesforce.com India Pvt Limited: *Salesforce Developer*

August 23 – December 24

- Developed and optimized LWC/Aura components, Apex Classes, Triggers, Flows, and inbound & outbound API integrations for enterprise customers, improving application performance by 30% and streamlining business processes through scalable, reusable solutions.
- Designed and implemented a generic outbound integration framework & Error Logging Mechanism, reducing development effort by 35% and improving integration & error logging scalability, reusability, and consistency across multiple systems.
- Solved complex business and system challenges using scalable design patterns and OOP, improving maintainability by 30%.
- Resolved critical production issues through root cause analysis, reducing downtime by 25% and improving efficiency by 20%.

Tata Consultancy Services India Pvt Ltd: *Salesforce Developer*

August 21 – August 23

- Built scalable Salesforce solutions using LWC, Aura, Apex, and SOQL/SOSL, improving performance by 25% and reducing manual effort.
- Delivered business-aligned solutions using Flows, Visualforce, and JavaScript, improving process efficiency by 20%.
- Streamlined deployments using GitHub, SFDX, Ant, and Change Sets, reducing release time by 30% and improving reliability.

EDUCATION

Government College of Engineering, Chandrapur

August 2017 – August 2021

- Bachelor of Engineering (2021)
- University Rank 1 Holder; Gold Medalist (Topper of the University)
