 - **Certifications:** Administrator 201, PD1 Developer
-

WORK EXPERIENCE

ITC Infotech • Bengaluru, India

Mar 2025-Present

Senior Salesforce Developer

- Working on BAT (British American Tobacco) global multi-country Salesforce implementation across Europe and Canada.
 - Designed and implemented scalable data retention, anonymization, and deletion frameworks ensuring compliance with GDPR regulations.
 - Developed Batch Apex solutions to efficiently process high-volume data while maintaining strict governor limit compliance.
 - Implemented metadata-driven architecture to support dynamic, country-specific business logic and improve maintainability.
 - Built and enhanced REST API integrations with external systems using asynchronous processing (Queueable/Batch Apex).
 - Refactored legacy Future methods into Queueable and Batch Apex, significantly improving system performance and scalability.
 - Developed and maintained reverse integration mechanisms to ensure seamless and reliable data synchronization.
 - Collaborated with cross-functional global teams to deliver secure, high-performance, and scalable Salesforce solutions.
-

Salesforce Developer | Experience Cloud | LWC | Integrations

- Yokogawa is a global leader in industrial automation, operating in over 60 countries worldwide.
- Played a key role in delivering a Customer Portal supporting 50,000+ users, improving operational efficiency by 30%.
- Designed and implemented scalable solutions using synchronous and asynchronous Apex (Batch, Future, Queueable).
- Developed complex Apex triggers and reusable frameworks following Salesforce best practices.
- Led and supported team efforts in resolving production issues, enhancements, and user stories, ensuring high system reliability.
- Optimized data operations using efficient SOQL/SOSL queries, improving performance and reporting capabilities.
- Implemented core Service Cloud functionalities including Case Management, Knowledge Base, and SLA automation.
- Developed scalable Salesforce solutions including advanced case management and service-level agreements (SLAs).
- Developed Lightning Web Components (LWC) to enhance UI performance and user experience.
- Configured Flows, Process Automation, and Service Console to streamline business processes and improve productivity.
- Built governor-limit-compliant solutions ensuring scalability and long-term system stability.
- Configured case assignment and escalation rules to enhance case lifecycle management.
- Implemented Single Sign-On (SSO) using SAP Customer Data Cloud (CDC), improving authentication and security.
- Managed Named Credentials and Remote Site Settings to enable secure and seamless external integrations.

EDUCATION

Vignanasudha Degree College - Sri Venkateshwara University
Bachelors in Computer Science

Jun 2018- Sep 2021
