

MANOJ PALURI

Salesforce Developer | +91-9121506768 | Manojpaluri6768@gmail.com

Salesforce Certified Platform Developer I • Salesforce Certified Administrator • Salesforce Certified Agentforce Specialist

PROFESSIONAL SUMMARY

- Having an overall 5.9 years of work experience in which 4+ years of experience in Salesforce.
- Having good experience in activities related to SFDC Salesforce.com Setup, Configuration, Customization, Data Migration, Unit Testing, and deployment to production of applications to Force.com platform.
- Developed Custom objects and created Page-Layouts, and Record-types to meet the various requirements.
- Experience in implementing the Master-Detail, Look-up, Many-to-many, and Hierarchical relationships and automate the business Process using Workflow rules, Approval Process, Auto-Response Rules, and Escalation Rules.
- Experience on Salesforce.com developer toolkit (force.com IDE) and developed Trigger, Apex classes, Controllers, SOSL & SOQL, Metadata, Configured Security settings at Object & Field level and Sharing Rules at Record level.
- Expertise in controlling the data access across the Application using Field-level security and Organization-wide Defaults, creating Profiles, Queues, setting up Role Hierarchy, Company profile and writing the Sharing Rules as per the Requirements.
- Proficient in Data Migration from Traditional Applications and Legacy Systems, as well as within Salesforce Orgs using tools like Data Loader, Salesforce Import, Export Wizard and Dataloader.io.
- Good understanding and knowledge in designing Reports, Dashboards, experience in development of Visual Force Page, Apex Controllers, and Test classes, Apex Schedulers, Batch Apex and Triggers.
- Extensive experience with expertise in Design, Development, Code Merge, Deployment, Testing, Go-live, Postproduction Support.
- Extensive experience in DevOps tools, like GitHub.
- Have been involved in all segments of SDLC such as Requirement Analysis, Designing and Developing applications, Unit Testing and Documentation.
- Hands on experience in Lightning Web Components and Aura.
- Excellent team player, self-motivated, quick learner with good communication skills and trouble-shooting capabilities.

TECHNICAL SKILLS

Salesforce Clouds: Sales Cloud, Service Cloud, Salesforce CPQ, Experience Cloud, Data Cloud (concepts), Agentforce AI

Development: Apex Classes, Apex Triggers, Trigger Handler Frameworks, LWC, Aura Components, Visualforce, SOQL, SOSL, Batch Apex, Queueable Apex, Future Methods

Salesforce CPQ: Products, Product Options, Bundles, Nested Bundles, Price Rules, Discount Schedules, Quote Templates, Approvals, Quote Lifecycle Automation, Custom CPQ Extensions

Automation: Flow Builder, Screen Flows, Record-Triggered Flows, Scheduled Flows, Approval Processes, Process Builder, Workflow Rules, Validation Rules

Integration: REST APIs, SOAP APIs, Apex Callouts, Named Credentials, External Services, SAP Integration, Slack API, Postman, Integration Status Tracking

DevOps & Deployment: Azure DevOps CI/CD Pipeline Execution, Gearset, Git, GitHub, Salesforce DX, Change Sets, Sandbox to Production Deployments

Solution Design: End-to-end Architecture Design, Reusable Component Frameworks, Scalable Automation Patterns, Governor Limit Optimization

Security & Admin: Roles, Profiles, Permission Sets, Sharing Rules, Field-Level Security, Record Types, Page Layouts, Custom Objects

Data & Reporting: Data Loader, Workbench, Data Migration, Reports, Dashboards, Custom Report Types, Data Quality

Tools: VS Code, Developer Console, Postman, Microsoft Excel, Workbench, Salesforce Setup

PROFESSIONAL EXPERIENCE

United Industries Plastic Private Limited, India

Quality Assurance Engineer

Nov 2019 – Jul 2021

Full-time | Anantapur, Andhra Pradesh, India | On-site

CriticalRiver, India

Software Engineer – Salesforce Developer

May 2022 – Present

Project: DoorDash | Salesforce Developer | Team Size: 5

Implemented an ITSM solution using Salesforce Agentforce to modernize incident management and employee support operations. Delivered an end-to-end platform encompassing Experience Cloud portal, Slack integration, SLA tracking, Omni-Channel Routing, and Knowledge Base — reducing average case resolution time and improving first-contact resolution rates.

- Architected and implemented Experience Cloud portal serving 200+ internal users, enabling self-service incident reporting and status tracking
- Built Slack-Salesforce integration using REST API callouts and Named Credentials, reducing average ticket acknowledgment time by ~40%
- Designed Omni-Channel Routing rules and SLA tracking flows that improved agent workload distribution and ensured SLA compliance across 3 support tiers
- Developed 6+ reusable LWC components for service request automation, reducing manual data entry and increasing agent efficiency
- Created custom Apex triggers and classes for real-time data population based on business logic with full test coverage (85%+)
- Managed permission sets, custom permissions, and profile configurations for role-based access across all user groups
- Executed sprint-based delivery in Agile model, collaborating with cross-functional teams and stakeholders on requirement analysis and UAT

Project: NextEra Energy | Production Support Engineer | Team Size: 5

Supported and enhanced a Sales Cloud implementation automating energy distribution workflows and customer lifecycle management. Managed production stability for a platform handling lead-to-customer conversion flows, third-party integrations, and business automation across multiple customer segments.

- Resolved 50+ production issues within SLA, maintaining 99%+ platform uptime for energy distribution automation workflows
- Built and maintained LWC components for lead flow and campaign management, accelerating lead-to-customer conversion process
- Implemented REST API integrations with 3 third-party systems, enabling real-time data synchronization across energy distribution platform
- Managed OWD and Sharing Rules for multi-portal environment serving both residential and business customer segments
- Created and maintained 15+ reports and dashboards providing real-time operational visibility to business stakeholders
- Performed data migration and post-refresh activities using Data Loader and Excel (including VLOOKUP-based reconciliation)

Project: Sun Life Financial – Policy Management | Salesforce Developer | Team Size: 12

Developed and maintained a comprehensive insurance policy management platform supporting policy applications, endorsements, renewals, cancellations, and online payments. Delivered integrations with SAP, Middleware (MW), and CC systems, and implemented Salesforce Sites with REST API for customer and agent-facing modules.

- Designed and implemented REST API integrations with SAP, MW, and CC systems, enabling real-time policy data sync across 2 modules (customer and agent portals)

- Built Salesforce Sites and Apex callouts supporting online payment processing via debit/credit card, handling 500+ policy transactions
- Developed LWC components and Visualforce pages for policy lifecycle operations — endorsements, renewals, holds, and cancellations
- Implemented sharing settings (OWD + Sharing Rules) to enforce data security across customer and agent roles in a multi-portal environment
- Created custom objects, formula fields, and validation rules to support complex insurance business logic and data integrity
- Collaborated with QA and cross-functional integration teams across 3 external systems; delivered all milestones within agreed sprint cycles

Project: Agent / Customer Support (Intel Warranty) | *Salesforce Developer* | *Team Size: 9*

Implemented a Service Cloud-based warranty management platform enabling customers to submit and track service/case tickets for Intel products. Delivered end-to-end automation for warranty workflows and community portal, reducing manual case handling.

- Led requirement gathering and translated business needs into scalable Service Cloud architecture covering case management, warranty workflows, and community portals
- Built custom Community pages, email templates, and automated case routing — reducing average case handling time through end-to-end automation
- Developed custom objects, formula fields, workflows, page layouts, and validation rules from scratch for warranty use case
- Wrote Apex classes and test classes achieving 80%+ code coverage; deployed using Ant Scripts with zero production rollbacks
- Imported and reconciled legacy warranty data using Data Loader, ensuring data quality and business continuity during go-live

CERTIFICATIONS

- Salesforce Certified Platform Developer I
- Salesforce Certified Administrator
- Salesforce Certified Agentforce Specialist

EDUCATION

Bachelor of Engineering – Mechanical Engineering

Aditya Engineering College (AEC), Kakinada | Affiliated with JNTUK | 2018

Career Transition Note: Pivoted from Mechanical Engineering into Salesforce development in 2022, leveraging strong analytical and systems-thinking foundations to design scalable CRM solutions.
